

01 MINDSET WHY MOST WORKERS STAY STUCK

Most guys don't stay stuck because they're lazy.
They stay stuck because they never change how they think.

They show up, do what they're told, go home,
and repeat it for years.

They wait for:

DIRECTION

OPPORTUNITY

RECOGNITION

HERE'S THE TRUTH:

Nobody is looking for someone
who just does what they're told.

They're looking for someone who:

- ✓ Makes the day easier
- ✓ Keeps work moving
- ✓ Solves problems before they grow

**If you don't change how you think,
your position won't change.**

02 AWARENESS WHAT ACTUALLY GETS YOU NOTICED (ON REAL JOBSITES)

1 YOU DON'T WAIT — YOU LOOK AHEAD

- You're already thinking about the next task
- You're already checking materials
- You're already identifying problems

If your foreman has to
constantly tell you what
to do, you're not ready
to move up.

2 YOU SOLVE PROBLEMS — NOT JUST POINT THEM OUT

Bring solutions, not just problems.

3 YOU COMMUNICATE CLEARLY

Confirm instructions. Ask the right questions.
Keep people informed.

Say it early —
not when it becomes
a problem.

4 YOU MAKE THE JOB RUN SMOOTHER

Ask yourself daily:
"Am I making this job easier or harder?"

That's how
leadership
sees you.

03 THE DAILY SYSTEM THIS IS WHERE YOU SEPARATE YOURSELF

1 PLAN BEFORE WORK STARTS (PLANNING PHASE)

- Know what the goal is for the day
- Know what materials are needed
- Know what could go wrong

Use the Pre-Task Safety Plan to:

- ✓ Align the crew
- ✓ Identify risks
- ✓ Set expectations

This is where good days are created.

2 EXECUTE DURING THE DAY (EXECUTION PHASE)

This is where jobs fall apart.

Things change:

- Weather
- Materials
- Crew availability
- Other trades

Most people react.
Leaders adjust.

Use the Job Hazard Analysis (JHA) to:

- ✓ Break down tasks
- ✓ Identify hazards
- ✓ Adjust controls

You're not just working —
you're managing risk.

3 TRACK TRACK THE DAY (ACCOUNTABILITY PHASE)

If you're not tracking work,
you're guessing.

Use the Daily Report /
Foreman Log to track:

- ✓ What actually got done
- ✓ Manpower
- ✓ Equipment
- ✓ Delays

This protects you
and shows your value.

4 REVIEW END OF DAY (SEPARATION PHASE)

This is where most people fail.
They go home without thinking
about tomorrow.

Leaders:

- ✓ Review the day
- ✓ Identify what slowed them down
- ✓ Prepare for the next day

This is how
you stay ahead.

04 HABITS THAT MOVE YOU UP TOOLBOX HABITS

Show up early and prepared

Keep your work area organized

Take ownership

Ask better questions

Follow through on what you say

Consistency beats talent every time on a jobsite.

05 MINDSET SHIFT THIS CHANGES EVERYTHING

If you want to move up, you have to start thinking
like someone who already has the position.

That means:

- ✓ Stop waiting
- ✓ Start anticipating
- ✓ Think in terms of outcomes, not tasks

BIG SHIFT:

FROM:

"What do I need to do?"

TO:

"What needs to happen
for this job to succeed?"

06 COMMON MISTAKES THAT KEEP PEOPLE STUCK

Waiting for direction

Blaming other trades

Not planning ahead

Poor communication

Ignoring documentation

These are career killers.

07 THE 8 WASTES THAT KILL JOBSITES (AND HOW TO FIX THEM)

Most jobs don't fail because people aren't working hard.
They fail because of waste—time, effort, and poor planning.

1 WAITING

Standing around
because of:

- No direction
- No material
- Waiting on another trade

FIX IT:

- Always ask "What's next?"
- Have a backup task ready
- Think ahead

2 REWORK (DOING IT TWICE)

Firing mistakes:

- Wrong layout
- Poor install
- Missed details

FIX IT:

- Do it right the first time
- Double-check your work
- Ask questions early

3 OVERPRODUCTION

Doing work
before it's needed.

FIX IT:

- Stay aligned with the plan
- Don't get ahead of coordination

4 UNNECESSARY MOVEMENT

Walking, searching,
wasted motion.

FIX IT:

- Stage tools and materials
- Set up your work area

5 TRANSPORTATION

Moving material
multiple times.

FIX IT:

- Plan delivery locations
- Move things once, not twice

6 OVERPROCESSING

Doing more work
than required.

FIX IT:

- Follow the plan
- Don't overbuild

7 INVENTORY

Too much material
sitting around.

FIX IT:

- Keep only what you need
- Stay organized

8 NOT USING PEOPLE'S SKILLS

Not speaking up
or using experience.

FIX IT:

- Share ideas
- Ask questions
- Take ownership

WHY IT MATTERS:

SAVE TIME

REDUCE MISTAKES

KEEP JOBS MOVING

**THAT'S HOW YOU STAND OUT.
THAT'S HOW YOU MOVE UP.**

08 SIMPLE FOREMAN SYSTEM

REPEAT EVERY DAY.

1. PLAN
Look ahead.
Set the day.

2. LEAD
Direct the crew.
Keep it moving.

3. TRACK
Production.
Issues.
Progress.

4. IMPROVE
Fix mistakes.
Prepare for tomorrow.

FINAL MESSAGE

“Being a foreman isn't about being
the best worker on the crew—
it's about making everyone
else better.”
