BUILDER ASCENT FIELD SYSTEM

## 1 THE LEAN CONSTRUCTION PHILOSOPHY

Lean is about eliminating waste to create smooth, predictable work. It's not about working harder—it's about working smarter.

### CORE PRINCIPLES

|  |                                                                   |
|--|-------------------------------------------------------------------|
|  | <b>VALUE</b><br>Deliver what the customer actually needs.         |
|  | <b>FLOW</b><br>Keep work moving smoothly.                         |
|  | <b>ELIMINATE WASTE</b><br>Remove anything that doesn't add value. |
|  | <b>RESPECT PEOPLE</b><br>Involve your team. Improve together.     |

“A job doesn't fail because people work hard. It fails because we waste time.”

## 2 THE 8 WASTES ON THE JOBSITE

Know them. Spot them. Eliminate them.

|                                                                                 |                                                                            |
|---------------------------------------------------------------------------------|----------------------------------------------------------------------------|
| <b>1 WAITING</b><br>Delays waiting on people, materials, or information.        | <b>2 REWORK</b><br>Doing work twice due to mistakes or poor quality.       |
| <b>3 OVERPRODUCTION</b><br>Doing more work than needed, or too early.           | <b>4 MOTION</b><br>Unnecessary movement by people.                         |
| <b>5 TRANSPORTATION</b><br>Moving materials more than necessary.                | <b>6 INVENTORY</b><br>Excess materials or equipment not in use.            |
| <b>7 OVERPROCESSING</b><br>More work or higher quality than the customer needs. | <b>8 UNUSED TALENT</b><br>Not using people's skills, ideas, or experience. |

Eliminate waste. Build excellence. That's how you stand out.

## 3 THE LEAN DAILY CYCLE

A simple system you can run every day.

REPEAT EVERY DAY.

- Plan Better
- Work Smarter
- Deliver Results

## 4 PLANNING THE WORK

Plan the work. Work the plan.

### THE 3-LEVEL PLANNING PROCESS

|  |                                                               |
|--|---------------------------------------------------------------|
|  | <b>1. MASTER PLAN</b><br>Define milestones and big phases.    |
|  | <b>2. PHASE PLAN</b><br>Break it down by area or system.      |
|  | <b>3. LOOKAHEAD PLAN</b><br>Plan 3-6 weeks of work in detail. |
|  | <b>4. WEEKLY WORK PLAN</b><br>Commit to what will be done.    |

### KEY QUESTIONS

- ✓ What is the goal?
- ✓ What do we need?
- ✓ What can get in the way?
- ✓ What's the sequence?

## 5 LAST PLANNER SYSTEM®

Plan together. Commit together. Succeed together.

### THE 5 CONVERSATIONS

|          |                                         |
|----------|-----------------------------------------|
| <b>1</b> | <b>SHOULD</b><br>What needs to be done? |
| <b>2</b> | <b>CAN</b><br>What can be done?         |
| <b>3</b> | <b>WILL</b><br>What will we do?         |
| <b>4</b> | <b>DID</b><br>What did we do?           |
| <b>5</b> | <b>LEARN</b><br>What can we do better?  |

### WHY IT WORKS

- Improves reliability
- Reduces waste
- Builds team accountability
- Drives continuous improvement

## 6 FLOW & RELIABILITY

Keep work moving. Keep promises.

### WHAT KILLS FLOW?

- ✗ Poor scheduling
- ✗ Trades not coordinated
- ✗ Missing materials
- ✗ Waiting on information
- ✗ Rework and mistakes

### WHAT CREATES FLOW?

- ✓ Clear plan
- ✓ Ready work areas
- ✓ Materials staged
- ✓ Reliable commitments
- ✓ Daily communication

### RELIABILITY FORMULA

$$\text{RELIABILITY} = \frac{\text{TASKS COMPLETED}}{\text{TASKS COMMITTED}} \times 100\%$$

Reliable planning = predictable results.  
Unreliable planning = wasted time.

## 7 CONTINUOUS IMPROVEMENT

Small improvements. Big results.

### THE KAIZEN MINDSET

- ✓ Look for a better way every day.
- ✓ Fix problems at the source.
- ✓ Empower your team to improve.
- ✓ Measure and learn.
- ✓ Never stop improving.

### EXAMPLE IMPROVEMENTS

- Reduce wait time
- Standardize the best way
- Improve material layout
- Eliminate handoffs
- Simplify complex tasks

“We don't rise to the level of our goals, we fall to the level of our systems.”  
— James Clear

## 8 LEAN IN ACTION

Apply it. Live it. Lead it.

### THE LEAN LEADER

- Thinks ahead
- Eliminates waste
- Builds a reliable team
- Solves problems
- Delivers results
